

**AMENDMENTS TO THE SPECIFICATION**

Please replace paragraph [0206] with the following amended paragraph [0206]:

[0206] When the buffer memory 25d not only this but the capacity is not clear, it is possible to output continuously until it receives the busy signal or buffer full signal from buffer memory 25d. Moreover, in the above-mentioned embodiment, the recording condition setting program is recorded on the program area of the flash memory 39. It may be recorded on other recording mediums (for example a CD-ROM, a magneto-optic disk, a memory card, a flexible disk, etc.). In this case, the information reproducing device corresponding to each recording medium will be added, and the recording condition setting program will be installed in the program area of the flash memory 39 from the information regenerative apparatus.
